

Miniature VSAT Service

Reliability to the Extreme™

Harris CapRock's marine miniature VSAT service is engineered specifically for compact size and simple installation onboard maritime vessels and offshore rigs. The fully managed service enables remote site communications – without the limitations imposed by space constraints and cost restrictions – keeping offshore teams reliably connected to the rest of the world.

BENEFITS

- > Provides flexibility with compact and portable antenna design
- > Saves time and money with quick setup
- > Reduces costs of satellite air-time versus mobile satellite services

Solution Overview

Multiple voice channels and secure real-time data transfers
 Supports C and Ku band coverage data transfers
 Unlimited data usage with one monthly fee
 24/7 Harris CapRock CSC support

Supports the Communications Requirements of

Offshore rigs	Seismic vessels
FPSOs	Tankers
Supply vessels	Engineering vessels

Technical Specifications

Antenna reflector size	60 cm
Antenna weight	30 kg
Radome size	75 cm
Coverage	Regional and global
VSAT bands	C and Ku band
Typical data rates	Up to 256 kbps
